### **Dunn Joins Intuitive Medical Software**

Springfield, Missouri – February 27, 2008 – Craig Frazier, president of Intuitive Medical Software, LLC, announced that Wes Dunn has joined the EMR software company’s management team as head of its sales division.

Dunn brings to this position more than 25 years of experience in sales, marketing and business operations with both start-up and established medical companies. Before moving to IMS in October, 2007, Dunn had served as vice president of Laser Vision Centers and TLC Laser centers since 1996, where he was responsible for sales, marketing, operations and business development.

“Wes brings the knowledge, experience and leadership needed to introduce the medical community to our ability to develop and implement EMR technology for specialty physicians,” said Frazier. “His unique understanding of the specialty physician’s business and operational needs is critical as we deploy our EMR solutions across the wider U.S. health care system.”

#### ***About Intuitive Medical Software, LLC***

Founded by Dr. Howard Follis, Intuitive Medical Software, LLC, is headquartered in Springfield, Missouri. The company develops software products that assist medical providers in transitioning to electronic maintenance and management of patient visits and records. Data entered into an IMS system can be transferred to and from other electronic systems in our healthcare system, a critical component of efforts to redesign healthcare delivery systems. With its innovative approach to specialty EMR software, IMS stands poised to play a significant role in transforming the quality of our nation’s healthcare.
