## UroChartEHR CAPABILITIES OF MEANINGFUL USE OBJECTIVES AND MEASURES: CORE SET

UroChartEHR Capabilities	Objective	Measure
✓	Use Computerized Physician Order Entry (CPOE) for medication orders directly entered by any licensed healthcare professional who can enter orders into the medical record per state, local and professional guidelines	More than 30% of unique patients with at least one medication in their medication list seen by the provider have at least one medication order entered using CPOE
✓	Implement drug-to-drug and drug-allergy interaction checks	The physician has enabled this functionality for the entire EHR reporting period
✓	Generate and transmit permissible prescriptions electronically (eRx)	More than 40% of all permissible prescriptions written by the provider are transmitted electronically using certified EHR technology
✓	Record demographics <ul style="list-style-type: none"> <li>• preferred language</li> <li>• gender</li> <li>• race</li> <li>• ethnicity</li> <li>• date of birth</li> </ul>	More than 50% of all unique patients seen by the physician have demographics recorded as structured data
✓	Maintain an up-to-date problem list of current and active diagnoses	More than 80% of all unique patients seen by the physician have at least one entry or an indication that no problems are known for the patient recorded as structured data
✓	Maintain active medication list	More than 80% of all unique patients seen by the physician have at least one entry (or an indication that the patient is not currently prescribed any medication) recorded as structured data
	Maintain active medication	More than 80% of all unique

	allergy list	patients seen by the physician have at least one entry (or an indication that the patient has no known medication allergies) recorded as structured data
	Record smoking status for patients 13 years old or older	More than 50% of all unique patients 13 years old or older seen by the physician have smoking status recorded as structured data
<b>UroChartEHR will deliver this capability in its coming release</b>	Implement one clinical decision support rule relevant to specialty or high clinical priority along with the ability to track compliance of that rule	Implement one clinical decision support rule
<b>UroChartEHR will deliver this capability in its coming release</b>	Report ambulatory clinical quality measures to CMS or the States	For 2011, provide aggregate numerator, denominator, and exclusions through attestation. For 2010, electronically submit the clinical quality measures
<b>UroChartEHR is enhancing this capability to include diagnostic test results in its coming release</b>	Capability to exchange key clinical information (ie: problem list, medication list, medication allergies, diagnostic test results) among providers of care and patient-authorized entities electronically	Performed at least one test of certified EHR technology's capacity to electronically exchange key clinical information
	Provide patients with an electronic copy of their health information (including diagnostic test results, problem list, medication lists, medication allergies), upon request	More than 50% of all patients of the physician who request an electronic copy of their health information are provided it within three business days
	Provide clinical summaries for patients for each office visit	Clinical summaries provided to patients for more than 50% of all office visits within three business days
	Protect electronic health information created or maintained by the certified EHR technology through the implementation of appropriate technical capabilities	Conduct or review a security risk analysis per 45 CFR 164.308 (a)(1) and implement security updates as necessary and correct identified security deficiencies as part of its risk management process

UroChartEHR currently offers this capability

- Ten of 16 measures from the Core set are required to meet "Meaningful Use" Criteria
